*When used on toner it is advisable to print in gray scale and with maximum toner density. We recommend the use of our VELOUR lamination film range.

** Preliminary tests are recommended with screen printing and UV digital coating.

Storage: store in a dry and clean place far from heat sources and humidity (max 30°C and 55% of relative humidity). Do not expose rolls to direct sunlight. Protect the partially used rolls and keep a high stock rotation. The film should be allowed to reach operating room temperature 24 hours before use.

Note: trial tests are recommended before proceeding with full production run so as to verify the suitability of the product for its specific application. Verify the compatibility of the film with inks and adhesives. Please visit our web site for more details.
